In the Claims:

1-2. (Canceled)

3. (Original) The device of claim 30, wherein each said portable device further includes an additional memory component for storing said at least one instruction, wherein said logic is a microprocessor.

4. (Original) The device of claim 30, wherein said logic is a microprocessor and wherein said at least one instruction is stored on said non-volatile memory.

5. (Original) The device of claim 16, wherein the portable device does not feature a user interface for communicating directly with a user.

6-12. (Canceled)

13. (Original) The device of claim 16, wherein said device interface includes a physical connector to another communication port.

14. (Original) The device of claim 16, wherein said non-volatile memory is a flash memory.

15. (Original) The device of claim 16, further comprising a volatile memory component selected from the group consisting of RAM, SD-RAM, S-RAM and DRAM.

16. (Currently Amended) A portable device for device-to-device data transfer, comprising:

(a) a non-volatile memory for storing the data; and

(b) a single device interface for enabling the data to be transferred between the portable device and another such portable device;

wherein operations of both the portable device and said other portable device, with respect to the data, are restricted to data storage and transfer; wherein the portable device is operative to function as a stand alone device while exchanging the data with said other portable device; and wherein said single device interface is a sole interface of the portable device for data exchange between the portable device and any other device.

17-29. (Canceled)

30. (Original) The device of claim 16, wherein the portable device further includes:

(c) a logic for executing at least one instruction for controlling said transfer of the data.

31. (Original) The device of claim 30, wherein said instructions are not alterable by the user.

32. (Original) The device of claim 16, wherein communication between the portable device and said other portable device only occurs through said device interfaces.

33. (Original) The device of claim 16, wherein the device lacks an operating system.

34. (Original) A system for data storage for a user, the system comprising a plurality of portable devices, each of said portable devices including:

(a) a non-volatile memory for storing the data; and

(b) a single device interface for enabling the data to be transferred directly between another one of said portable devices and said each portable device;

wherein operations of said portable devices with respect to the data are restricted to data storage and transfer; wherein said portable devices are operative to function as stand alone devices while exchanging data; and wherein, for each said portable device, said single device interface is a sole interface of said each portable device for data exchange between said each portable device and any other device.

35-36. (Canceled)

37. (Original) The device of claim 16, wherein both the portable device and said other portable device are operative to function as stand alone devices while exchanging data.

38-42. (Canceled)

43. · (New) The device of claim 16, wherein said single device interface is for enabling the data to be transferred directly between the portable device and said other such portable device.
